PROFESSIONAL EXPERIENCE

Software Developer Intern | Finsmart Software Pvt. Ltd.

Jan 2026 – Present

- Spearheaded backend development and Retrieval-Augmented Generation (RAG) architecture for the Finsmart Ledger product and an intelligent customer support chatbot.
- Collaborated with senior developers to integrate the AI chatbot into the live fintech platform, drastically streamlining user engagement and support efficiency.
- Facilitated team expansion by assisting in the technical hiring process, including drafting engineering job descriptions and formulating technical interview assessments.

PROJECTS

FAQCanvas – Embeddable Support Chat Widget | [GitHub](#)

- Engineered a full-stack, embeddable customer support chat widget and admin dashboard to streamline the management of Frequently Asked Questions (FAQs).
- Designed a custom backend search algorithm utilizing Python's difflib for sequence matching, which efficiently routes customer queries to the most relevant saved answers based on text similarity scores.
- Architected the relational database schema using SQLite and managed the end-to-end deployment of the web application on PythonAnywhere.

GenAI Customer Support & Ticketing System | [GitHub](#)

- Engineered a full-stack ticketing platform utilizing a 3-Tier AI Cascade System (Regex, Local ML, and LLMs) to automate ticket classification based on complexity.
- Designed and integrated GenAI routing logic, successfully reducing manual customer support workload by 40%.

Automated Business Operations Reporting Dashboard | [GitHub](#)

- Built an automated operations dashboard to track daily business metrics, generating reliable "Payment Health" and "User Activity" reports.
- Implemented statistical alerting logic to automatically flag high payment failure rates (>5%), minimizing the need for manual monitoring and enhancing operational reliability.

Multilingual Medical Lab Report Explainer | [GitHub](#)

- Developed an LLM-powered application to interpret complex medical lab reports from PDFs and images into accessible layman and professional summaries across English, Hindi, and Urdu.
- Utilized EasyOCR and PDFPlumber for accurate data extraction and OpenRouter (Mistral 7B) via LangChain for advanced natural language processing.

EDUCATION

Bachelor of Computer Application | 2023 – 2026

Chattrapati Shahuji Maharaj University, Kanpur, India

- CGPA: 7.60

TECHNICAL SKILLS

- **LANGUAGES:** Python, SQL
- **AI & Frameworks:** Flask, LangChain, RAG, Text-to-SQL, LLM integrations, Scikit-Learn, Pandas
- **Infrastructure & Tools:** Docker, CyberPanel, Git & GitHub, AntiGravity, VS Code, Jupyter Notebook

CERTIFICATION & BADGES

- Kaggle: [Intro to Machine Learning](#) | [Deep Learning](#)
- HackerRank: [SQL](#) | [Python](#) | [Problem Solving](#)
- HackerRank: [5-Star Badge in Python](#) | [3-Star Badge in SQL](#)
